The Clinical Services Roadmap (CSR) was launched to develop a regional system of integrated care and improve access to available resources across the SE LHIN. CSR was designed to cut down on the red tape faced by patients moving from one caregiver to another, and help hospitals and the CCAC better integrate their services to deliver more seamless care. This is an excellent example of the kind of collaboration that leads to better health care. Working together are the region's seven hospitals, SE CCAC, community providers and the SE LHIN to improve service provision, reduce program duplication and improve access, efficiency and effectiveness.
